

## PUBLIC NOTICE

On March 12, 2014, a major disaster declaration was issued by President Obama following severe storms, tornadoes, straight-line winds, and flooding that occurred between February 10 and February 14, 2014. Hazard Mitigation Grant Program (HMGP) funds were made available to provide resources to assist states, tribal governments, territories and local communities in their efforts to reduce or eliminate the risk of repetitive flood damage to buildings and structures insurable under the National Flood Insurance Program (NFIP) as authorized by the National Flood Insurance Act of 1968, as amended. This funding is implemented under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207.

Greenville County proposes to purchase and demolish ten flood prone single family residential dwellings in Greenville County, South Carolina using HMGP funds. These structures are located within the base or one percent chance floodplain and therefore are subject to review under the President's Floodplain Management Executive Order, EO 11988. Public comment about restoration of these facilities and the application of the Executive Order was invited by notice April 2014. Upon successful offer acceptance and sale, the county will inspect, abate any hazardous conditions, and then demolish the structures within 90 days of purchase. The site will then be restored and deed restricted as open space consistent with 44 CFR Part 80 in perpetuity. Greenville County will take ownership and be responsible for post-project site maintenance and inspections. Acquiring and demolishing the structures is the only permanent solution to mitigate the risk of flooding, as an elevation would still have residual risk exposure. The properties chosen for this mitigation effort are detailed below:
